

COATED STENT CRIMPER

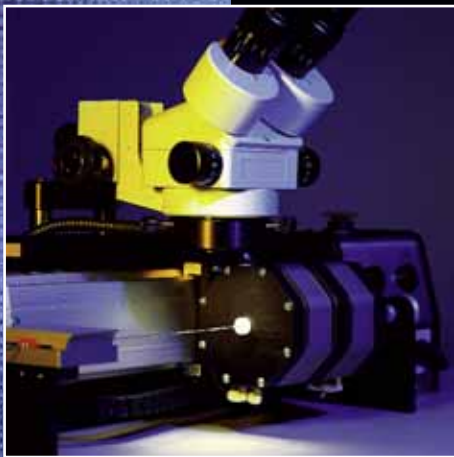

## Coated Stent Crimper

Given the ongoing shifting of the stent market from bare stainless steel to coated stents, requirements related to crimping technology have been raised yet again to a new level.

Fortimedix has anticipated this market trend by the development of a dedicated Coated Stent Crimper (patent pending)

Utilizing key technology of the very successful, fully automated Universal Stent Crimper, in combination with new surface protection and pressure distribution solutions, prevents coating damage without compromising stent retention.

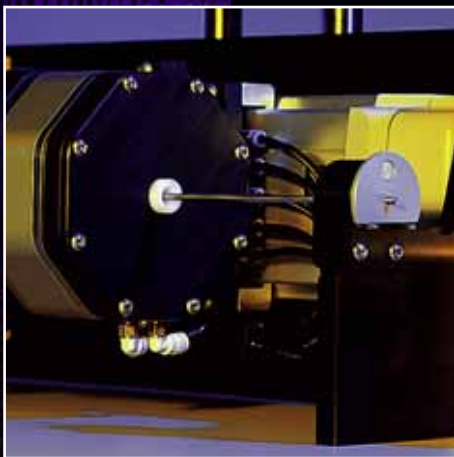

- Suitable for coated, grafted and uncoated stents
- No coating damage
- No tool marks
- Exchangeable stent surface protection unit
- No cleaning when switching between coatings
- Integrated surface protection release system
- Unsurpassed process consistency
- PLC controlled automated process cycle
- Over-The-Wire & Rapid Exchange compatible
- No operator dependency
- No tool changes or adjustments
- No pre crimp profile measurements

### Optional

CCD camera system

Quick interchange cartridge system (coronary/peripheral)
